

Light and Dark Knowledge Organiser

This half term we will be learning all about 'Light and Dark'. We will be learning about:

- The similarities and differences between night and day
- Different sources of light (natural and man-made)
- Shadows and how they are caused.
- What animals come out in day-time and what animals come out in night-time

How can you support our learning:

- Read stories and information books about day and night
- Talk to your children about what we can see in the day and what we see at night (sun, clouds, moon, stars, different animals)
- During the holidays think about the different activities you are doing at different times in the day.
- Take some photos of experimenting with different light sources and creating shadows.

To support our learning, we will be using the following books:

- Owl Babies by Martin Waddell
- Peace at Last by Jill Murphy
- Burglar Bill by

Light and Dark Vocabulary

Light Source	Something that gives off light
Shadow	A dark shape caused by an object blocking light
Sun	A natural light source
Bright	A high level of light
Dim	A low level of light
Day-time	The time between morning and evening when it is light
Night-time	The time between evening and morning when it is dark
Reflection	An object that bounces back the light or object it is facing
Shades	Lighter and darker versions of a colour
Nocturnal	An animal that is awake in during night-time and sleeps in day-time
