

Beachcombers

Born: 21 May 1799; Lyme Regis, Dorset, England

Died: 9 March 1847, Lyme Regis, Dorset, England

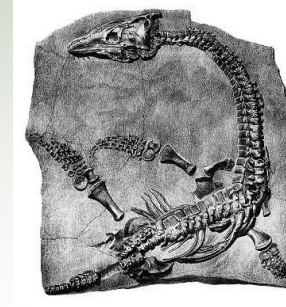

Key Text

Stone Girl Bone Girl

By L. Anholt

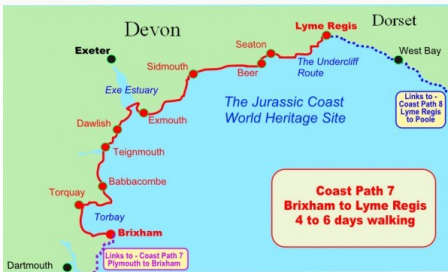

Mary Anning— Famous for finding rare dinosaur fossils on the coast of Lyme Regis.

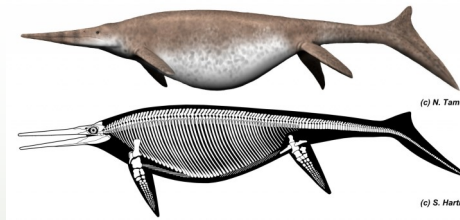

Fossil— The preserved remains or traces of a dead organism. Fossils are formed by the process of fossilisation.

Palaeontologist— A scientist who studies fossils.

Lyme Regis in Dorset— a town in the south of England.

Ichthyosaur - which means 'fish lizard'.

Coast—Where the land meets the sea.

Plesiosaur

Dimorphodon

Mary went on to make more incredible discoveries in her life, including a long-necked marine reptile called a Plesiosaur and a flying reptile called a Dimorphodon.
